

Subtracting Fractions

In Focus

How much of the cake is left?

Two pieces have already been eaten. I am taking another piece.

Let's Learn

- 1 Each piece is 1 seventh of the cake.

$$\frac{5}{7}$$

There are 5 sevenths of the cake.

Is taking 1 seventh of the cake.

$$\frac{1}{7}$$

5 sevenths - 1 seventh = 4 sevenths

$$\frac{5}{7} - \frac{1}{7} = \frac{4}{7}$$

4 sevenths of the cake is left.

- 2 Subtract $\frac{1}{9}$ from $\frac{5}{9}$.

$$\frac{5}{9} - \frac{1}{9} = \square$$

5 ninths - 1 ninth
= ninths

Guided Practice

1 Subtract.

$$\frac{4}{5} - \frac{3}{5} = \square$$

$$\frac{6}{7} - \frac{4}{7} = \square$$

2 Subtract.

$$\frac{4}{5} - \frac{1}{5} = \square$$

$$\frac{2}{8} - \frac{1}{8} = \square$$

$$\frac{3}{4} - \frac{2}{4} = \square$$

$$\frac{4}{6} - \frac{1}{6} = \square$$

3 Subtract.

(a) $\frac{6}{7} - \frac{3}{7} = \square$

(b) $\frac{6}{9} - \frac{2}{9} = \square$

(c) $\frac{7}{8} - \frac{1}{8} = \square$

Subtracting Fractions

1 Subtract.

$$(a) \quad \frac{2}{8} - \frac{1}{8} = \square$$

$$(b) \quad \frac{9}{10} - \frac{3}{10} = \square$$

$$(c) \quad \frac{8}{12} - \frac{3}{12} = \square$$

$$(d) \quad \frac{6}{7} - \frac{4}{7} = \square$$

2 Fill in the blanks.

$$(a) \quad \frac{9}{10} - \square = \frac{6}{10}$$

$$(b) \quad \frac{7}{11} - \square = \frac{2}{11}$$

$$(c) \quad \frac{2}{3} - \square = \frac{1}{3}$$
