

<u>Science Progression of Knowledge</u>		Year 1	Topic: Animals Including Humans
<u>National Curriculum Objectives:</u>	<u>Essential Vocabulary:</u>	<u>Substantive Knowledge:</u> - children MUST know this by the end of the unit	<u>Working Scientifically Objectives:</u>
<ul style="list-style-type: none"> • identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals • identify and name a variety of common animals that are carnivores, herbivores and omnivores • describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets) • identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense 	<ul style="list-style-type: none"> • <u>Names of animal groups:</u> fish, amphibians, reptiles, birds, mammals. • <u>Animal diets:</u> carnivore, herbivore, omnivore. • <u>Human and animal body parts:</u> e.g. body, head, neck, arms, elbows, legs, knees, face, ears, eyes, nose, hair, mouth, teeth, hands, feet, tail, wings, feathers, fur, beak, fins, gills. • <u>Human senses:</u> sight, hearing, touch, smell, taste. • <u>Exploring senses:</u> loud, quiet, soft, rough. <p><u>Other:</u> human, animal, pet.</p>	<ul style="list-style-type: none"> • There are many different animals with different characteristics • Animals need food to survive (carnivores, omnivores and herbivores). • Animals need a variety of food to help them grow, repair their bodies, be active and stay healthy. • Animals move in order to survive. • Exercise keeps animal's bodies in good condition and increases survival chances. • Animals have senses to help individuals survive. • When animals sense things they are able to respond 	<ul style="list-style-type: none"> • Use a Venn diagram to sort animals to show which are herbivores, carnivores and omnivores. • Use a tally chart to gather data and information. • Use information gathered in tally charts • Carry out my own research using simple sources to find out what a particular animal needs in order to survive.
<u>Prior Knowledge:</u>	<u>Future Knowledge:</u>	<u>Working at Greater depth:</u>	<u>Science Enquiry/Key Questions:</u>
<p>In Early Years children should:</p> <ul style="list-style-type: none"> • be able to identify different parts of their body. • Have some understanding of healthy food and the need for variety in their diets. • Be able to show care and concern for living things. • Know the effects exercise has on their bodies. • Have some understanding of growth and change. • Can talk about things they have observed including animals 	<p>In year 2 children will learn:</p> <ul style="list-style-type: none"> • notice that animals, including humans, have offspring which grow into adults • find out about and describe the basic needs of animals, including humans, for survival (water, food and air) • describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene 	<ul style="list-style-type: none"> • Can they begin to classify animals according to a number of given criteria? • Can they point out differences between living and non-living things? • Can they name some parts of the human body that cannot be seen? • Can they say why certain animals have certain characteristics? • Can they name a range of wild animals? 	<ul style="list-style-type: none"> • What do animals eat? • Do all animals eat the same food? • Which of our senses is the most accurate at identifying food? • Do all animals hunt? • Why are animals different colours and patterns? • Is our sense of smell better when we cannot see? • How does my height change over the year?

<u>National Curriculum Objectives:</u>	<u>Essential Vocabulary:</u>	<u>Substantive Knowledge:</u> - children MUST know this by the end of the unit	<u>Working Scientifically Objectives:</u>
<ul style="list-style-type: none"> notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air) describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene 	<ul style="list-style-type: none"> <u>Being born and growing:</u> Young, offspring, live young, grow, develop, change, hatch, lay, fly, crawl, talk. <u>Young and adult names:</u> e.g. lamb and sheep, kitten and cat, duckling and duck. <u>Life cycle stages:</u> e.g. baby, toddler, child, teenager, adult; frogspawn, tadpole, froglet, frog. <u>Survival and staying healthy:</u> basic needs, survive, food, air, exercise, diet, nutrition, healthy, balanced diet, hygiene, germs. <u>Food groups:</u> fruit and vegetables, proteins, dairy and alternatives, carbohydrates, oil and spreads, fat, salt, sugar. <p>Previously introduced vocabulary: water.</p>	<ul style="list-style-type: none"> All animals eventually die. Animals reproduce new animals when they reach maturity. Animals grow until they reach maturity and then don't grow any larger. Life cycles vary between different animals 	<ul style="list-style-type: none"> Carry out my own research using simple sources to find out what a particular animal needs in order to survive.
<u>Prior Knowledge:</u>	<u>Future Knowledge:</u>	<u>Working at Greater depth:</u>	<u>Science Enquiry/Key Questions:</u>
In Year 1 children should: <ul style="list-style-type: none"> identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets) identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense 	In Year 3 children will learn: <ul style="list-style-type: none"> identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat identify that humans and some other animals have skeletons and muscles for support, protection and movement 	<ul style="list-style-type: none"> Can they explain that animals reproduce in different ways? 	<ul style="list-style-type: none"> Do all animals grow and live the same way? Do bigger animals live longer? Why are we all different heights? How and why do we grow and change? Do bananas make us run faster? Which offspring belongs to which animal? How does a tadpole change over time? How much food and drink do I have over a week? What food do you need in a healthy diet and why?

<u>Science Progression of Knowledge</u>		Year 3	Topic: Animals Including Humans
<u>National Curriculum Objectives:</u>	<u>Essential Vocabulary:</u>	<u>Substantive Knowledge:</u> - children MUST know this by the end of the unit	<u>Working Scientifically Objectives:</u>
<ul style="list-style-type: none"> • identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat • identify that humans and some other animals have skeletons and muscles for support, protection and movement 	<ul style="list-style-type: none"> • <u>Food groups and nutrients:</u> fibre, fats (saturated and unsaturated), vitamins, minerals. • <u>Skeletons and muscles:</u> skeleton, muscles, tendons, joints, protection, support, organs, voluntary muscles, involuntary muscles, biceps, triceps, contract, relax, bone, cartilage, shell, vertebrate, invertebrate, endoskeleton, exoskeleton, hydrostatic skeleton. • <u>Names of human bones:</u> e.g. skull, spine, backbone, vertebral column, ribcage, pelvis, clavicle, scapula, humerus, ulna, pelvis, radius, femur, tibia, fibula. • Other: energy. <p>Previously introduced vocabulary: movement.</p>	<ul style="list-style-type: none"> • Many animals have skeletons to support their bodies and protect vital organs. • Muscles are connected to bones and move them when they contract. • Movable joints connect bones 	<ul style="list-style-type: none"> • Classify a variety of foods into different food groups. • Carry out my own research to find out what foods different animals eat, and record findings. • Generate questions to investigate to find out what pets eat. • Gather data in a tally chart and convert the results into a pictogram. • Use data to draw conclusions and find the answer to my question. • Label a diagram of the human skeleton. • Use a variety of sources of information to find out how invertebrates protect themselves and report findings. • Ask and answer questions about muscles. • Make different movements with my body and explain which muscles are used.
<u>Prior Knowledge:</u>	<u>Future Knowledge:</u>	<u>Working at Greater depth:</u>	<u>Science Enquiry/Key Questions:</u>
In Year 2 children should: <ul style="list-style-type: none"> • notice that animals, including humans, have offspring which grow into adults • find out about and describe the basic needs of animals, including humans, for survival (water, food and air) • describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene 	In Year 4 children will learn: <ul style="list-style-type: none"> • describe the simple functions of the basic parts of the digestive system in humans • identify the different types of teeth in humans and their simple functions • construct and interpret a variety of food chains, identifying producers, predators and prey 	<ul style="list-style-type: none"> • Can they explain how the muscular and skeletal systems work together to create movement? • Can they classify living things and non-living things by a number of characteristics that they have thought of? • Can they explain how people, weather and the environment can affect living things? • Can they explain how certain living things depend on one another to survive? 	<ul style="list-style-type: none"> • How do the skeletons of different animals compare? • How does our skeleton change over time? • Why do animals have skeletons? • What is a healthy diet and why is it important? • How do we move? • Why do we need a skeleton? • What types of skeleton are there? • Are all skeletons the same? • Can something survive without a skeleton?

<u>Science Progression of Knowledge</u>		Year 4	Topic: Animals Including Humans
<u>National Curriculum Objectives:</u>	<u>Essential Vocabulary:</u>	<u>Substantive Knowledge:</u> - children MUST know this by the end of the unit	<u>Working Scientifically Objectives:</u>
<ul style="list-style-type: none"> • describe the simple functions of the basic parts of the digestive system in humans • identify the different types of teeth in humans and their simple functions • construct and interpret a variety of food chains, identifying producers, predators and prey 	<ul style="list-style-type: none"> • <u>Digestive system:</u> digest, digestion, tongue, teeth, saliva, salivary glands, oesophagus, stomach, liver, pancreas, gall bladder, small intestine, duodenum, large intestine, rectum, anus, faeces, organ. • <u>Types of teeth and dental care:</u> molar, premolar, incisor, canine, wisdom teeth, tooth decay, plaque, enamel, baby (milk) teeth. • <u>Food chains and animal diets:</u> decomposer, food web. <p>Previously introduced vocabulary: producer, consumer, prey, predator, excretion, habitat.</p>	<ul style="list-style-type: none"> • Animals need a variety of foods to help them grow and survive. • Different animals are adapted to eat different foods. Humans require a balanced diet to remain healthy but healthy diets vary depending upon the type of activity that humans do. • Animals have teeth to help them eat. Different types of teeth do different jobs. • Food is broken down by the teeth and further in the stomach and intestines where nutrients go into the blood. The blood takes nutrients around the body. • Nutrients produced by plants move to primary 	<ul style="list-style-type: none"> • Classify a wide variety of animals to show whether they are herbivores, carnivores or omnivores. • Present information about how to keep teeth healthy. • Draw a diagram to show what I think the digestive system looks like and how it works. • Ask a variety of questions about the digestive system and use different sources to find out the answers. • Label a diagram of the digestive system and describe how it works. • Plan and carry out an experiment (making sure it is a fair test) to explore how acid affects the food in our stomachs.
<u>Prior Knowledge:</u>	<u>Future Knowledge:</u>	<u>Working at Greater depth:</u>	<u>Science Enquiry/Key Questions:</u>
<p>In Year 3 children should:</p> <ul style="list-style-type: none"> • identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat • identify that humans and some other animals have skeletons and muscles for support, protection and movement 	<p>In Year 5 children will learn:</p> <ul style="list-style-type: none"> • describe the changes as humans develop to old age 	<ul style="list-style-type: none"> • Can they classify living things and non-living things by a number of characteristics that they have thought of? • Can they explain how people, weather and the environment can affect living things? • Can they explain how certain living things depend on one another to survive? 	<ul style="list-style-type: none"> • What are the names for all the organs involved in the digestive system? • How can we organise teeth into groups? • Are foods that are high in energy always high in sugar? • Why are teeth important? • What happens to our food? • What is our digestive system? • How does an eggshell change when it is left in

<u>Science Progression of Knowledge</u>		Year 5	Topic: Animals Including Humans
<u>National Curriculum Objectives:</u>	<u>Essential Vocabulary:</u>	<u>Substantive Knowledge:</u> - children MUST know this by the end of the unit	<u>Working Scientifically Objectives:</u>
<ul style="list-style-type: none"> describe the changes as humans develop to old age 	<ul style="list-style-type: none"> <u>Process of reproduction:</u> gestation, asexual reproduction, sexual reproduction, sperm, egg, cells, clone. <u>Changes and life cycle:</u> embryo, foetus, uterus, prenatal, adolescence, puberty, menstruation, adulthood, menopause, life expectancy, old age, hormones, sweat. <u>Changing body parts:</u> e.g. breasts, penis, larynx, ovaries, genitalia, pubic hair. <p>Previously introduced vocabulary: reproduction, reproduce, types of animals and animal groups, fertilisation.</p>	<ul style="list-style-type: none"> Humans development is in stages (baby, child, teenager, adult, old age). During puberty humans experience changes. Gestation periods are different for different animals. 	<ul style="list-style-type: none"> Write a report about the development of children from age 0 to 11.
<u>Prior Knowledge:</u>	<u>Future Knowledge:</u>	<u>Working at Greater depth:</u>	<u>Science Enquiry/Key Questions:</u>
<p>In Year 4 children should:</p> <ul style="list-style-type: none"> describe the simple functions of the basic parts of the digestive system in humans identify the different types of teeth in humans and their simple functions construct and interpret a variety of food chains, identifying producers, predators and prey 	<p>In Year 6 children will learn:</p> <ul style="list-style-type: none"> identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function describe the ways in which nutrients and water are transported within animals, including humans 	<ul style="list-style-type: none"> Can they create a timeline to indicate stages of growth in certain animals, such as frogs and butterflies? Can they describe the changes experienced in puberty? Can they draw a timeline to indicate stages in the growth and development of humans? 	<ul style="list-style-type: none"> Can you identify all the stages in the human life cycle? How do different animal embryos change? Is there a relationship between a mammal's size and its gestation period? Why and how does the human body change over time?

<u>Science Progression of Knowledge</u>		Year 6	Topic: Animals Including Humans
<u>National Curriculum Objectives:</u>	<u>Essential Vocabulary:</u>	<u>Substantive Knowledge:</u> - children MUST know this by the end of the unit	<u>Working Scientifically Objectives:</u>
<ul style="list-style-type: none"> • identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood • recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function • describe the ways in which nutrients and water are transported within animals, including humans 	<ul style="list-style-type: none"> • <u>Circulatory system:</u> circulation, heart, pulse, heartbeat, heart rate, lungs, breathing, blood vessels, blood, pump, transported, oxygenated blood, deoxygenated blood, oxygen, arteries, veins, capillaries, chambers, plasma, platelets, white blood cells, red blood cells. • <u>Lifestyle:</u> drug, alcohol, smoking, disease, calorie, energy input, energy output. • <u>Other:</u> water transportation, nutrient transportation, waste products. <p>Previously introduced vocabulary: carbon dioxide.</p>	<ul style="list-style-type: none"> • Oxygen is breathed into the lungs where it is absorbed by the blood. • The heart pumps blood around the body. • Muscles need oxygen to release the energy from food to do work: Oxygen is taken into the blood in the lungs, the heart pumps blood through blood vessels to the muscles, the muscles take the oxygen and nutrients from the blood 	<ul style="list-style-type: none"> • Plan a clinical trial to explore the effects of different foods on our bodies, explaining how I will make it a fair test and what I expect the results to show. • Allocate a variety of foods to their correct food group. • Assess a variety of food labels to assess which of a group of foods has e.g. the most and least fat, or the most and least carbohydrate. • Use a diagram of the human heart to suggest how it works. • Write a detailed report about how the circulatory system works. • Take my own pulse before and after exercise, recording the differences. • Design an investigation to explore how exercise affects our heart rate and draw conclusions from my results. • Label muscle groups on a diagram of the human body. • Suggest some exercise that would train different muscle groups. • Create a presentation to answer a particular question about drugs, using my own research to find answers.
<u>Prior Knowledge:</u>	<u>Future Knowledge:</u>	<u>Working at Greater depth:</u>	<u>Science Enquiry/Key Questions:</u>
<p>In Year 4 children should:</p> <ul style="list-style-type: none"> • describe the simple functions of the basic parts of the digestive system in humans • identify the different types of teeth in humans and their simple functions • construct and interpret a variety of food chains, identifying producers, predators and prey <p>In Year 5 children should:</p> <ul style="list-style-type: none"> • describe the changes as humans develop to old age 	<p>In KS3 children will learn:</p> <ul style="list-style-type: none"> • the tissues and organs of the human digestive system, including adaptations to function and how the digestive system digests food (enzymes simply as biological catalysts) • calculations of energy requirements in a healthy daily diet • the consequences of imbalances in the diet, including obesity, starvation and deficiency diseases • the effects of recreational drugs on behaviour, health and life processes. 	<ul style="list-style-type: none"> • Can they compare the organ systems of humans to other animals? • Can they make a diagram of the human body and explain how different parts work and depend on one another? • Can they name and locate the major organs in the human body? 	<ul style="list-style-type: none"> • How does the length of time we exercise for affect our heart rate? • Can exercising regularly affect your lung capacity? • Which type of exercise has the greatest effect on our heart rate? • Which organs of the body make up the circulation system, and where are they found? • How does my heart rate change over the day? • How much exercise do I do in a week?
