

Fractions: Hundredths

Aim

- To recognise and use hundredths.

Success Criteria

- To count up and down in hundredths.
- To recognise that hundredths arise when dividing an object by one hundred.
- To recognise that hundredths arise when dividing tenths by ten.

Hundredths arise where a number of objects or an object is divided into one hundred equal parts:

This grid has one hundred equal parts.

One hundredth is shaded.

$\frac{1}{100}$ is shaded.

How many hundredths are shaded?

$$\frac{36}{100}$$

How many hundredths are not shaded?

$$\frac{64}{100}$$

How many hundredths are shaded?

How many hundredths are not shaded?

$$\frac{76}{100}$$

How many hundredths are shaded?

$$\frac{99}{100}$$

How many hundredths are not shaded?

$$\frac{1}{100}$$

How many hundredths are shaded?

$$\frac{41}{100}$$

How many hundredths are not shaded?

$$\frac{59}{100}$$

How many hundredths are shaded?

$$\frac{85}{100}$$

How many hundredths are not shaded?

$$\frac{15}{100}$$

How many hundredths are shaded?

$$\frac{50}{100}$$

How many hundredths are not shaded?

$$\frac{50}{100}$$

How many hundredths are shaded?

$$\frac{73}{100}$$

How many hundredths are not shaded?

$$\frac{27}{100}$$

How many hundredths are shaded?

$$\frac{12}{100}$$

How many hundredths are not shaded?

$$\frac{88}{100}$$

How many hundredths are shaded?

$$\frac{68}{100}$$

How many hundredths are not shaded?

$$\frac{32}{100}$$

A number can be divided into hundredths by dividing by 100:

This grid has the number 150 divided into hundredths.

One hundredth is shaded

$$\frac{1}{100} \text{ of } 150 = 1.5$$
