

Measuring objects

You will need a ruler or tape measure for this activity.

Look around the house and find 4 different objects. Using your ruler / tape measure estimate the length and width of each object. After estimating, measure each object to find out how close your were with your estimation!

How long and wide is each object?

List four objects	Estimate the length & width m or cm	Measure the actual length & width	How far out were you?
1.	Length Width		
2.	Length Width		
3.	Length Width		
4.	Length Width
