## Measuring the Surface that an Object Covers

This is a 1-inch square tile.

**1** Using the 1-inch square tile, estimate how much surface each figure covers.

(a)

This figure covers  times the surface that the square tile covers.

(b)

This figure covers  times the surface that the square tile covers.

(c)

This figure covers  times the surface that the square tile covers.

(d)

This figure covers  times the surface that the square tile covers.

(e)

This figure covers  times the surface that the square tile covers.
