Give me 5

3852 + 3458 =

10576 - 4878 =

495 x 6 =

2/5 (2 fifths) of 45 =

3859 x 0 =

Mind Workout

Tickets for a school concert were sold to adults and children at different prices as shown in the table.

	Price per ticket
Adult	£6
Child	£3

The same number of adult tickets and child tickets were sold.
The total amount of money collected from the sale of tickets was £558.
How many adult tickets were sold?

Complete the word problem for your classmates to solve.

_____ has _____ _____.
(name 1) (3-digit number) (objects)

_____ has _____ times as many _____ as _____ has.
(name 2) (1-digit number) (objects) (name 1)

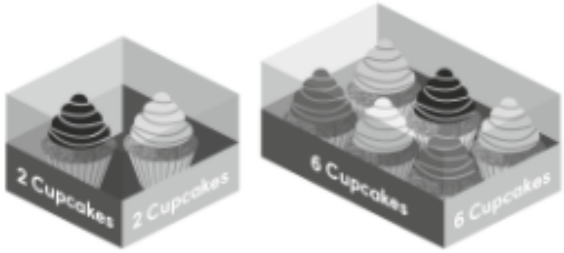
How many _____ do _____ and _____
(objects) (name 1) (name 2)

have altogether?

Mind Workout

Date:_____

A bakery sells cupcakes in small boxes of 2 or regular boxes of 6.

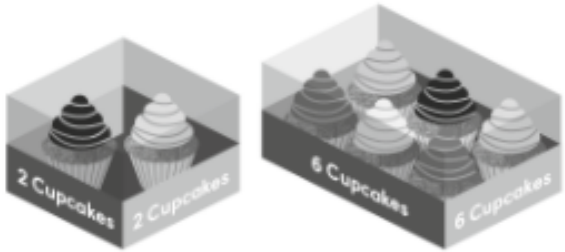


The bakery baked 188 cupcakes.
After packing them into the boxes, there were 2 more regular boxes than there were small boxes.
How many small boxes and regular boxes of cupcakes were there altogether?

Mind Workout

Date:_____

A bakery sells cupcakes in small boxes of 2 or regular boxes of 6.



The bakery baked 188 cupcakes.
After packing them into the boxes, there were 2 more regular boxes than there were small boxes.
How many small boxes and regular boxes of cupcakes were there altogether?

188 − 12 = 176
176 ÷ 4 = 44

Number of small boxes = 44 ÷ 2 = 22
Number of regular boxes = 22 + 2 = 24
22 + 24 = 46

There are 46 small and regular boxes altogether.
