Wednesday February 3rd- Mind Workout

Mind Workout ▶

Holly wants to arrange 20 cards for a memory game.
Each row should have the same number of cards.
This is one way she can arrange the cards.

2 rows of 10

Draw another way that she can arrange the cards.
You may use 🂠 to help you.

During a class activity, the girls are asked to form a line.
Two boys are instructed to stand in between two girls.

If there are 10 girls along the line, how many boys are there?

There are ☐ boys.

Complete the two problems.
Work with your classmates to solve each problem.
