Dear Parents/Carers with a child in UKS2

Upper Key Stage 2 Online Resources

At Round Hill, we subscribe to a number of fantastic online resources. These resources are used to engage and enthuse the children, as well as enhancing learning, both at home and school. To access all of these resources online, please visit our [UKS2 Online Resources](#) page on the school website which has links directly to the various websites.

Purple Mash

Purple Mash is a creative online space which hosts an exciting mixture of curriculum focused activities, programs and games to support and inspire creative learning. Your child can access a variety of activities using their Purple Mash log in details, which can be found at the front of your child's reading record. In year 5/6, Purple Mash is mainly used to support the Computing curriculum in school.

Spelling and Grammar Bug Club

This resource builds on the children's learning in Phonics from earlier year groups. In year 5/ 6, this online resource is predominantly used to teach and consolidate spelling rules and patterns. Children access these activities in school but are encouraged to follow up at home through watching the videos and playing the related games. The grammar element of the program is used to support teaching in lessons and this also consolidates the grammar homework that children are asked to complete each week in their CGP grammar book.

MyMaths

The teachers will set weekly homework tasks using the MyMaths resource for children in Year 5 and Year 6. Specific tasks are set to consolidate the learning taking place in school. There are also lots of other activities that your child can complete in their own time. Please note that your child's MyMaths username and password can be found at the front of your child's reading record.

Times Table Rock Stars (TTRS)

This resource is designed to support children with learning and practicing their multiplication and division facts. Children can access different games and activities in addition to earning rewards. In years 5 and 6, we often set 'battles' between classes and we encourage children to regularly access this resource at home to improve their rapid recall of times tables. Please note that your child's username and password details can be found at the front of their reading record.

Kind regards

Mrs Paterson and Mrs White
