Key Instant Recall Facts

Year 2

KIRF Autumn Term 2: Know all addition and subtraction facts for all numbers between 0 and 20

This is building on the skill of knowing the number bonds to 20. Children should now become familiar with and practise all the different combinations of adding and subtracting numbers to a total of 20 (for example, $2 + 16 = 18$, $17 - 5 = 12$, $5 + 3 = 8$, $6 + 7 = 13$, $20 - 9 = 11$, etc.)

Ideas:

Activity 1: Play games involving 2 dice and ask your child to add the total for each player.

Activity 2: Use objects, such as cubes and counters, to consider the bonds in a practical way.

Activity 3: Look at the patterns with both objects and numbers e.g. as one number increases the other one decreases.

Activity 4: Practise with the numbers in order and chosen randomly - remember the aim is for the child to be able to respond immediately.
